

Joy Akinyi Nyaware is a Public Health Research Professional with over three years of experience in health systems research, environmental health, and community-based public health programs. She holds a Bachelor of Science in Environmental Health from Kenyatta University and has contributed to research and implementation projects with organizations including the African Population and Health Research Center (APHRC), Amref Health Africa, SNV Netherlands Development Organisation, and the National Environment Management Authority (NEMA).

Joy has extensive experience in health facility assessments, mixed-methods data collection, field supervision, and data quality assurance using digital tools such as Kobo Collect and Google Forms. Her work has focused on cardiometabolic diseases, non-communicable diseases, WASH, COVID-19, and health workforce strengthening.

She is passionate about translating research into practical solutions that improve health outcomes and strengthen health systems.

At Stowelink Foundation, Joy looks forward to collaborating with diverse teams to advance evidence-based public health interventions, promote innovation, and contribute to sustainable community development across Kenya and beyond.
